

India's First Virtual Patient Simulation Platform for Ayurveda

Jointly developed by

ALIGNED WITH NCISM REGULATIONS

॥ आयुर्वेदः आयुधम् ॥

NATIONAL COMMISSION FOR INDIAN SYSTEM OF MEDICINE

AyurSIM is designed in alignment with the Competency-Based Undergraduate Curriculum (CBU-CBCS) for BAMS prescribed by NCISM.

- ✓ Supports achievement of defined competencies across clinical domains
- ✓ Promotes early clinical exposure and progressive clinical reasoning
- ✓ Enables safe practice of clinical decision making
- ✓ Facilitates assessment of clinical competencies
- ✓ Strengthens readiness for real patient care
- ✓ Supports accreditation and quality assurance initiatives

Practice Before You Prescribe.
Build Competence. Ensure Patient Safety.

Why AyurSIM?

AyurSIM creates a lifelike clinical environment where learners interact with virtual patients as they would in a real consultation.

Complete Virtual Consultation

Take history, perform examination, analyse Dosha-Dushya involvement and Samprapti.

Clinical Decision Making

Arrive at differential diagnosis, plan investigations and select appropriate management.

Prescribe & Manage

Prescribe medicines, advise pathya-apathya and management, and provide patient counselling.

Follow-up & Outcomes

Observe patient progress in follow-up visits, modify treatment and view long-term outcomes.

Rare & Challenging Cases

Access uncommon and complex cases that are rarely encountered during routine postings.

Learn at Your Own Pace

Spend more time with each patient, revisit consultations and learn through reflection.

Key Highlights

54
Virtual Patient Simulations

9
Clinical Specialties

Complete Patient Follow-up

Rare Case Library

Safe Learning Environment

Competency-Based Learning

“ Learning through repeated practice under guidance is the essence of Yogasutriyam.”
— Acharya Sushruta

Immersive Learning Through Virtual Reality (VR)

Experience Nasya Therapy Like Never Before!

AyurSIM includes an immersive VR simulation of Nasya therapy—one of the important Panchakarma procedures in Ayurveda.

The VR simulation demonstrates every stage of the procedure.

Preparation of treatment room

Patient positioning

Administration of Nasya

Post-procedure care

Precautions & common errors

A realistic 3D environment builds procedural confidence before you step into the Panchakarma theatre.

9 Clinical Specialties

Kayachikitsa

Panchakarma

Shalya Tantra

Shalakya Tantra

Kaumarabhritya

Stri Roga & Prasuti Tantra

Agad Tantra

Bhuta Vidya

Rasayana & Vajikarana

Benefits for All Stakeholders

For Students

- Practice unlimited virtual consultations
- Improve diagnostic and prescribing skills
- Learn rare and complex cases
- Experience full patient management
- Build confidence before real patient care
- Prepare effectively for examinations

For Faculty

- Standardize and strengthen clinical teaching
- Objective assessment of competencies
- Case-based learning and discussions
- Track learner progress and performance
- Integrate with competency-based education

For Practitioners

- Continuing professional development
- Revision of classical clinical approaches
- Exposure to uncommon clinical scenarios
- Training of interns and postgraduate scholars
- Lifelong learning through virtual practice

Technology Meets Tradition

AyurSIM combines modern simulation technology with the timeless wisdom of Ayurveda. It complements traditional bedside teaching by providing safe, structured and competency-based learning for the future of Ayurveda.
